CHICAGO, IL (November 3, 2016) — Inever and its exclusive sales and support partner in the U.S., Matrix Packaging Machinery, powered by Pro Mach, showcase three innovative stickpack machines at Pack Expo. Inever, with corporate headquarters in Barcelona, announces the company has opened its first support office in the U.S. and has a new name, INV PACK – Inever Group. Single serve pharmaceuticals in stickpacks demonstrated

Single dose stickpacks containing syrups and liquids used to relieve the symptoms of colds, fevers, coughs, flu, upset stomach, and other common ailments are one of the hottest trends in the over-the-counter market today. At the Matrix booth, INV PACK – Inever Group shows a syrups and liquids stickpack machine with piston filler that demonstrates the forming and filling of single dose packaging. Two other machines will also be on display. This includes one that fills liquids, in this case dairy products. The second, forms and fills either liquids or powders on low volume lines.

INV PACK and Matrix have sold stickpack and sachet machines in the United States for more than three years. The keys to a steady increase in sales have rested on INV PACK product innovation and quality and Matrix sales, support, and credibility in the market. Both partners believe the new INV PACK support office in Chicago takes the duo to a new level of capabilities for U.S. customers due to an increase in factory trained support and applications personnel based there.

“Manufacturers benefit from INV PACK world-class knowledge in vertical form fill seal machinery, plus its application expertise in the food, dairy, pharmaceutical, and cosmetic industries,” said Joan Cubi, INV PACK Export Area Manager. “Our machines cover every aspect of stickpacks and sachets with successful implementations in liquids, viscous fluids, powder, and granulates.”

See the INV PACK – Inever Group solutions at the Matrix Pack Expo 2016 Booth # S-3726. For more information on INV PACK stickpack and sachet machine sales and service in the United States, call 888-628-7491 and visit www.MatrixPM.com.

###

About INV PACK – Inever Group

INV PACK – Inever Group’s experience dates back to 1995, when the company created its first vertical form fill seal machine in the innovative stick pack format. INV PACK – Inever Group has grown to become one of the world’s leading technology innovators in this market segment. For more information, visit <http://www.inever.es/en/>.
